

How to Specify Accessories

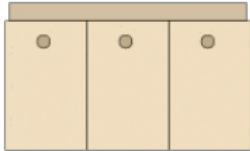

This final step in your locker room design is mostly optional and does not constitute requirements for having a finished product. These options range from finished base facing to finished crown molding and will add elegance to any locker room.

External Locker Accessories

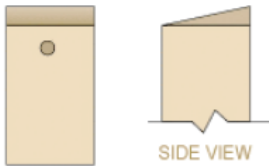

Crown Molding w/ Support

The addition of crown molding to your lockers exterior is a tasteful way to add visual interest as well as value. Standard 4-1/4" but comes in different heights upon request.

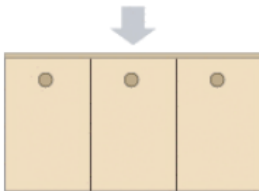

Light Valance

A valance can be installed in your design to hide lighting above the lockers. This look gives a very warm feeling to the room.

Slope Top

This design prevents members from storing articles on top the lockers as well as providing a dust cap so that debris does not accumulate over time.

Finished Top

This design is usually only provided on lockers that sit less than 72" off finished floor to cover the exposed melamine locker top.

External Door Accessories

Although these are the standard accessories available with our lockers, we can accommodate most hardware specified. Be sure to let us know what you are looking for when you contact us.

4" Wire Pull

1-1/4" Knob Pull

2"x3" Oval Name Plate
