

EXOTIC VENEER FINISHES BY CLASSIC

Exotic Veneers

Classic offers the latest range of exotic veneers — bringing you options rich in colors, textures, and patterns.

These distinguished wood styles, coupled with Classic's unique patented capability to produce five-piece veneer doors with raised or flat insert panels, allows our clients to create truly striking environments.

Additionally, these reconstituted exotic veneers exhibit remarkable consistency in color and pattern from sheet to sheet, which is ideal for large areas where matching is critical.

All Classic's wood products are finished with a 100% solid UV-cured sealer, followed with a clear water-borne UV anti-microbial top coat — all with zero VOC's applied — and at no additional cost.

Rift Cut White Oak

Anigre
